

Psychology Externship Program

VA New York Harbor Healthcare System
Brooklyn Campus

POLICIES AND PROCEDURES HANDBOOK

Wing Jin (Angel) Mak Psy.D. & Ashu Kapoor, Ph.D.
Co-Directors of Pre-doctoral Externship

Shalini Sehgal, Ph.D.
Director of Training, Pre-doctoral Internship

Valerie Abel, Psy.D.
Section Chief of Psychology, Brooklyn Campus
Director of Training, Geropsychology Postdoctoral Residency

Dear Psychology Externship Applicant:

In the pages ahead you will be learning about our externship training program. We wish to first provide you with some updated additional information about COVID-19 and adaptations to our training program.

As a hospital training program located in New York City, VA New York Harbor Healthcare System, Brooklyn Campus has been acutely aware of the personal and professional challenges presented by COVID-19 on our trainees and staff.

Transition to Telework, Telehealth, and Changes in Application Admission Requirements

With the support of medical center leadership, beginning in March 2020, we successfully transitioned all supervising psychologists and trainees to telework and made adaptations very quickly. Specifically, externs continued to conduct diagnostic interviews, individual therapy, and group therapy sessions over telehealth; and externs have received individual and group supervision over virtual media technologies. Externs have benefitted from live, direct observation of clinical care by supervising psychologists. At present, our supervising psychologists are on site three days a week and are teleworking two days a week. We have also similarly moved our externship program to a hybrid model as of Fall of 2022 with externs having the opportunity to work on-site and telework. We plan to continue working in this hybrid model for the foreseeable future.

Our Commitment to Training and Supervision

Despite the aforementioned modifications, we remain steadfast in our commitment to training and supervision. Going forward, while we cannot definitively predict how specific rotations or adjunctive training opportunities may evolve for 2023/2024 training year, we do know with certainty that there will continue to be more overall utilization in telehealth and technology-based delivery platforms. This presents a unique opportunity for our externs to receive in-depth training in tele-mental treatment.

Externship Interviews

It goes without saying that the health and safety of our Psychology Trainees, along with the competent care of our nation's veterans, is of utmost importance to us. At present, we plan to continue to conduct interviews virtually and will notify interested applicants should that change. Our program will continue to provide high quality training in professional psychology while simultaneously keeping our trainees' health and wellness at the forefront.

If you have questions you may contact our Co-Directors of the Externship via email or phone: Ashu Kapoor, Ph.D., ashu.kapoor@va.gov, 718-836-6600, ext. 8846 and Wing Jin Mak, Psy.D., Wing.mak@va.gov, 718-836-6600 ext. 3714. Our program is always happy to answer any questions that may help you decide to apply to our site.

Sincerely,

Ashu Kapoor, Ph.D.
Externship Program Co-Director

Wing Jin Mak, Psy.D.
Externship Program Co-Director

VA, New York Harbor Healthcare System, Brooklyn Campus

OVERVIEW

The psychology externship program of the VA New York Harbor Healthcare System's Brooklyn campus provides students with a clinically intense learning experience that includes individual and group psychotherapy as well as seminars and experiential group experiences. Veterans at our facility are coping with a wide variety of difficulties including substance abuse, posttraumatic stress disorder, grief and loss, depression, anxiety, personality disorders, family relationships, anger management, and chronic pain, among other difficulties. Our externship program has been a mutually positive experience for both externs and staff. It encourages professional growth and hopes to provide externs with a training experience that enables them to discover their own style as a clinician. Major extern responsibilities include individual psychotherapy and group psychotherapy. Externs who run groups will also have the opportunity to participate in a supervision group in which they are supervised by a licensed clinical psychologist on their group psychotherapy experiences. Externs will also participate in an extern process group facilitated by an outside consultant. In addition, externs attend weekly didactics/seminars covering a variety of topics. They also have opportunity to attend Mental Health department Grand Rounds. The externship year runs from September through May and is two days per week with Friday being a required day for the Brooklyn campus positions. Some clinic assignments require attendance on other days due to the nature of the nature and extend through the summer. Possible clinic area assignments are listed below.

****In the first paragraph of your cover letter, please rank up to two clinic area assignments in which you are interested.****

Please note that we will accept applications from students who are concurrently applying for internship and participation in our externship will have no adverse impact on a student's later chances of attending our internship program.

Posttraumatic Stress Disorder (PTSD) Clinic

Supervisor: Anita Deshpande, Ph.D.

The PTSD Clinic provides outpatient PTSD specialty care to a diverse group of veterans diagnosed with PTSD (and other comorbidities) regardless of trauma type. The clinic is multidisciplinary and is comprised of psychologists, psychiatrists, social workers, and nurse practitioners. An extern in the PTSD Clinic can expect to conduct trauma focused intake evaluations, provide individual therapy, and participate in weekly group intake supervision/triage with the PTSD Clinic intern.

Psychology Outpatient Rotation

Supervisors: Melissa Magnotti, Ph.D.

On this rotation we focus on giving the extern wide exposure to veterans who have experienced trauma and symptoms of PTSD. This includes combat as well as trauma in childhood and other types of traumatic experiences. The extern provides individual and group psychotherapy to this population, focusing on trauma work.

Staten Island CBOC Mental Health Externship

Supervisor: Vivian Mancino, Ph.D

Externs will have the opportunity to provide individual psychotherapy to a diverse population of veterans struggling with a myriad of issues including Post Traumatic Stress Disorder, Depression and Anxiety. Externs will be located one day in the Staten island Community VA Clinic and one day remote. Externs will receive supervision in the provision of short-term evidence-based treatments.

Psychosocial Rehabilitation and Recovery Center (PRRC)

Supervisors: Daniel Feld, Psy.D., Katelyn Zmigrodski, Psy.D

Externs working in the PRRC have the opportunity to provide a full range of psychological services in a milieu therapy program to veterans who require intensive mental health treatment. Currently, there are approximately 20-25 veterans enrolled in the program diagnosed with a wide range of mental health problems within the severe range pathology, including combat-related PTSD, schizophrenia / other psychotic disorders, major depressive disorder, bipolar disorder, anxiety disorders, and personality disorders secondary to another diagnosis. Many of the veterans in the PRRC also have co-morbid medical problems. As such, the PRRC focuses on a holistic model of care that addresses all aspects of the veterans' lives, including mental health, physical health, and multicultural identities. Veterans enrolled in the PRRC attend group programming Mondays through Wednesdays from 9am-3pm, which includes psychotherapy groups, music therapy, recreational therapy, peer led groups, and health education groups. We currently offer virtual programming on Thursdays and Fridays. Externs on this rotation are involved in conducting initial screenings and assessments, carrying a caseload of 4-7 individual cases, co-facilitating and leading various groups (both psychoeducational groups, skills based, and process groups), and the possibility of working with couples and families. Externs on this rotation also have the opportunity to work on an interdisciplinary team with psychologists, a social worker, a clinical nurse specialist, a creative arts therapist, a recreational therapist, a peer specialist, and psychology interns/extern, as well trainees from other disciplines. Externs will learn about the recovery model of care and, specifically, how to build upon each veteran's strengths and work collaboratively towards their treatment goals.

The PRRC rotation runs from September to May with options to start early or extend. Given the rotation requires 2.5 days, students who can commit to 20 hours/week are encouraged to apply.

Military Sexual Trauma (MST)

Supervisor: Shalini Sehgal, Psy.D.

Military Sexual Trauma or MST is the term used by the VA to refer to experiences of sexual assault or sexual harassment that a veteran experienced during his or her military service. Externs conduct comprehensive psychological intakes and carry a caseload of individual psychotherapy with survivors of MST. As MST is an experience and not a diagnosis, an Extern can expect to see a wide range of mental health issues. Referrals for MST Consultation come from a variety of sources, including primary care physicians, primary care mental health, veteran self-referrals, and other mental health clinicians. Externs on this rotation acquire knowledge and skills in working with shame, self-blame, anger/impulse control, impaired affect, and dissociative symptoms. Externs are expected to work in collaboration with other medical professionals, particularly psychiatry. Externs may also co-facilitate *Trauma Information Group*, utilizing a combined relational and psychoeducational group treatment protocol for sexual trauma survivors. Externs may have the opportunity to engage in hospital-wide

staff education and training related to MST. Externs are also involved in Sexual Assault Awareness month activities, including planning and participation in the annual MST Clothesline Project.

Community Mental Health Outpatient/Inpatient Services at St. Alban's

Supervisor: Annie Lee Jones, Ph.D.

This rotation, externs will have wide exposure to veterans who are referred for the treatment of a broad spectrum of mental health issues. This includes combat, as well as trauma in childhood and other types of traumatic experiences. The extern will provide individual and group psychotherapy to this population, focusing on the development of relational skills, and strategies for behavioral changes in their personal lives.

Combined MST and Psychology Outpatient Rotation

Supervisor: Elaine Lavin, Psy.D.

Externs on this rotation will spend approximately half their time seeing a general outpatient population with a range of mental health issues, and half their time focused on Military Sexual Trauma. Patients will be drawn from the St. Albans campus in Eastern Queens and present with a range of issues including PTSD, depression, anxiety, relationship concerns, and adjusting to life transitions. The extern will see these patients for individual therapy, which may include both short-term treatment and cases that last the duration of the training year. The extern may also co-lead a drop-in DBT skills group. Military Sexual Trauma or MST is the term used by the VA to refer to experiences of sexual assault or sexual harassment that a veteran experienced during their military service. As MST is an experience and not a diagnosis, an Extern can expect to see a wide range of mental health issues in this part of the rotation as well. Externs will see MST survivors for individual psychotherapy. They may also co-facilitate *Trauma Information Group*, utilizing a combined relational and psychoeducational group treatment protocol for sexual trauma survivors. Externs can expect to acquire knowledge and skills in working with shame, self-blame, anger/impulse control, impaired affect, and dissociative symptoms from their clinical work in both halves of this rotation. The rotation will likely be hybrid with the in-person component at either the Brooklyn or St. Albans Campuses. The St. Albans campus is easily accessible via the Long Island Rail Road's Babylon branch, 30 minutes from Manhattan.

Outpatient Neuropsychology

Supervisor: Julija Stelmokas, Psy.D., ABPP-CN with additional supervision and coverage by Valerie Abel, Psy.D., ABPP.

Neuropsychological assessment can assist in diagnostic clarification and prediction of long-term outcomes. A neuropsychological evaluation can be a therapeutic experience whereby patients and their family members can increase their understanding of symptoms and identify treatment options that can improve quality of life. The extern will have the opportunity to complete biopsychosocial interviews, administer/score/interpret results from neuropsychological tests using a fixed-flexible battery, utilize other psychodiagnostic instruments (e.g., structured clinical interviews, MMPI), and write reports that are tailored for multiple audiences within a fast-paced, multidisciplinary hospital setting. The extern will work with a variety of conditions such as mild cognitive impairment and dementia, neuromedical disorders, chronic health disease, and other neuropsychiatric presentations (e.g., polytrauma). The extern will gain knowledge and skills in delivering feedback to patients and

other stakeholders (e.g., family members, consulting providers). A competency and strength-based approach to supervision will be utilized with a focus on building necessary skills towards culturally humble and inclusive practice. Although externs pursuing a variety of career pathways are welcome, preference will be given towards those seeking clinical neuropsychology specialization. Opportunities for follow-up interventions within a brief nature may also be available depending on interest (e.g., post-feedback adherence, problem-solving therapy for those with stroke and depression, motivational interviewing for health behavior change). All clinical evaluations will be expected to be completed on site and face to face. However, should there be unforeseen changes such as from increased restrictions from COVID-19, this rotation would anticipate changing to a tele-health format consisting of tele-assessments and screening and interventions.

POLICIES REGULATING THE PSYCHOLOGY EXTERNSHIP PROGRAM

A. STRUCTURE OF EXTERNSHIP PROGRAM

The Psychology Externship Training Program is structured to provide an integrated and coordinated approach to training. Training is considered a responsibility of every staff member who is included in some function of the program.

1. The Psychology Externship Program is under the administration of the Department of Mental Health, Psychology Section and is administered by the Chief of Psychology and Assistant Chief of Psychology/Training Director. The Psychology Training Committee is composed of Chief of Psychology, Assistant Chief of Psychology/Training Director, supervisors, and staff psychologists.
2. The Externship Training Committee regulates the policies and procedures of the externship program. Individual supervisors are responsible for interviewing and selecting externs. The Training Committee is responsible for reviewing and evaluating externs' progress and certifies successful completion of the externship program.
3. The Externship Training Committee oversees the development and evaluation of clinical and didactic experiences for the externs.
4. Through regularly scheduled meetings, the Externship Training Committee engages in periodic review of the program to ensure that the philosophy, objectives and procedures of the program are adequately addressed.

B. APPLICATION PROCEDURE FOR PSYCHOLOGY EXTERNSHIP PROGRAM

The Training Committee follows the guidelines set by the Psychology Internship Directors of New York State and New York/New Jersey Association of Directors of Training.

1. Please submit applications through the NYNJADOT-PSYDNYS EXTERNSHIP portal only: (nynjadot.apa.org).
2. Applications are solicited and received by the Externship Directors. Rotation supervisors review applications, contact applicants directly, and interview applicants. Interviews will be held between January 23rd, 2023 – February 28th, 2023.

3. The application materials consist of: Curriculum Vitae, a letter of readiness from the applicant's program, two letters of recommendation, and graduate transcripts. Please include all materials in one PDF file. If your recommender prefers to send the letter of recommendation directly to us, please email it to wing.mak@va.gov.
4. A personal interview with a staff psychologist is required of each applicant.

C. ADMISSION PROCEDURE

Applicants are screened based on VA policy. They must be enrolled in an APA approved doctoral program in clinical or counseling psychology. Applicants who are U.S. citizens, documented immigrants, non-immigrants, or exchange visitors are all welcome to apply. You can check here [Am I Eligible? Checklist for VA HPTs](#) to learn more. Due to COVID-19 pandemic, all VA employees including externs, are required to be fully vaccinated against COVID-19 and will be asked to provide proof of vaccination. Exceptions for medical or religious reasons can be requested.

D. TRAINING ASSIGNMENTS

The program of training is designed to train externs as generalists through immersion in clinical work and careful supervision. Externs are assigned to one clinical area for the duration of the externship training year. Each of these clinical areas may require the extern to be present on specific days, with Fridays being required for all externs for didactics, and process group facilitated by an outside consultant, and group for group supervision for those externs participating in a clinical group experience.

E. SUPERVISION

Supervision is viewed as a process of learning about the treatment of patients and oneself in relation to them. Externs and supervisors work closely together. These relationships are a critical element in the training process.

1. Supervision takes a number of forms: 1-hour weekly individual supervision, 1-hour weekly group-for-group supervision, 1-hour weekly didactics
2. At least one hour of individual supervision is provided weekly for each rotation, however, some rotations will provide more than 1-hour of individual supervision.
3. Supervisors must have a doctoral degree in psychology from an APA approved institution and have completed an APA approved internship. They must also have State Certification.
4. Externs will participate in a weekly process-group which is facilitated by an outside consultant. This space is provided to externs to process their experience in a confidential space. The consultant does not disclose any information from the process group to the Externship Training Committee.

F. SCHEDULES

The training program is scheduled to provide a comprehensive experience that focuses on training requirements while being sensitive to individual needs of externs and program constraints.

1. The training program requires a minimum of 500 hours to be completed within the academic year, September through May, with some exceptions for externs to stay until September depending on rotation and supervisor.
2. The externship is two days weekly, with Friday being a required day. The standard 8-hour workday being is 8:00 a.m. to 4:30 p.m. At the start of the workday, externs must email their supervisors to inform them that they are signing in and to email their supervisors at the end of the day to let them know they are signing out.
3. We expect that externship is your main priority during the days you are with us, whether that is working remotely or on-site. If there are circumstances which may interfere with your ability to perform your responsibilities (e.g. outside employment, personal issues, health problems, school/dissertation issues), please discuss it with your direct supervisor as well as with the Training Directors.
4. Some rotations may require attendance on specific days or on an additional half-day. Additionally, some rotations may require a full-year training experience.
5. Externs are allowed 11 days off for vacation or illness through May. There are 11 Federal holidays that count toward these days off if they should fall on a scheduled externship day. This is to ensure that externs are meeting the required 500 hour minimum. Additional leave will be prorated if the externship extends past May. If an extern's rotation extends through the summer, they are given one day per leave for each month extended past May. When days are taken off, the extern must notify their supervisor in advance and arrange coverage for patients. If an extern is sick, they must notify their supervisor as soon as possible and arrange for patient notification or coverage. Externs and supervisors should keep track of requested leave.

Monday, October 9th, 2023: Indigenous Peoples Day

Friday, November 10, 2023: Veterans Day

Thursday, November 23, 2023: Thanksgiving Day

Monday, December 25, 2023: Christmas Day (observed)

Monday, January 1, 2024: New Year's Day (observed)

Monday, January 15, 2024: Martin Luther King Jr.'s Birthday

Monday, February 19, 2024: Washington's Birthday

Monday, May 27, 2024: Memorial Day

Wednesday, June 19, 2024: Juneteenth National Independence Day

G. PSYCHODIAGNOSTIC TESTING

Testing is not a formal component of the externship, but may be available on a case-by-case basis depending on clinical area and supervisor.

H. COMPUTER ACCESS

Externs are given access to computers which are equipped with software to perform word processing, data analysis, electronic mail systems, Internet access, and the hospital-wide recordkeeping system (CPRS). Externs are expected to utilize the CPRS for all medical record charting and to follow standard procedures regarding maintaining confidentiality of patients' medical records.
